GRANTEK

Engineer in a Box

- Secure
- Scaleable
- Reliable

Over 40 Years
of Turnkey Solutions

GRANTEK.COM

Engineer in a Box is a solution providing stability during the uncertainty of COVID-19. Grantek will ship you a small industrial PC (din-rail mount form factor) with cellular connection capabilities. Whenever it's needed, the hardware gets powered up, and connected to an ethernet switch anywhere on your OT network. It can be disconnected when the issue is resolved.

Secure *Integration*

Trusted software and hardware with Grantek's service and support combine to create the *Engineer in a Box* solution during COVID-19, without sacrificing security at all. In fact, the platform this is built upon is used for enterprise wide solutions in the utility sector.

Scaleable *In Real Time*

Once normal operations return, *Engineer in a Box* can be used for long-term, multi-facility solutions. Grantek already does this for our clients' IT groups.

Reliable *Across Your Operations*

Engineer in a Box will be on-hand in case an emergency comes up, and you need to give a vendor remote access to an aspect of your operations quickly.
