

AI NAVIGATOR

AI READINESS & USE CASE SEQUENCING

A safe, sequenced AI plan - not another pilot that goes nowhere.

What We Hear On Site

"Leadership wants an AI win. We've got pilots running at multiple plants and none tie to the a business case or overall strategy."

We'll Tell You When A Use Case Isn't Ready. That's Our Differentiator.

Assessed across the manufacturing stack by consultants who have built the data infrastructure AI depends on. No hype, no use case picked because it demos well.

THE VALUE

- Clarity on which AI use cases are real candidates, and which aren't
- A pilot plan you can take to leadership and get funded
- An honest read on readiness, not a vendor's sales pitch dressed up as an assessment

WHAT YOU GET

- AI readiness assessment across the five-layer manufacturing stack
- Ranked evaluation of use cases
- Sequenced roadmap tied to your data and infrastructure maturity
- Scoped, fundable pilot definition ready for leadership sign-off

WHY GRANTEK CONSULTING

We assess AI readiness across the five-layer manufacturing stack

AI Navigator identifies use cases before you spend your budget

We bridge the gap between a Consulting Roadmap and actual OT execution

We'll tell you when a use case isn't ready

Bring us your AI mandate.

info@grantek.com

We'll tell you which of your ideas are ready to build, and which aren't yet.
