

# DIGITAL MATURITY ASSESSMENTS

Before committing budget to transformation, you need an honest, externally benchmarked picture of where you stand. Our certified assessment frameworks deliver exactly that, and a prioritized roadmap your leadership can act on.

## WHAT IS A MATURITY ASSESSMENT?

### **A Common Baseline**

Give operations and IT leadership a shared, objective picture of where gaps exist before any technology decisions are made.

### **Roadmap-Ready Output**

Every assessment ends with a prioritized roadmap your leadership can fund and act on.

### **Globally Benchmarked**

Understand how your facilities compare against thousands of manufacturers world-wide, not just internal opinion.

### **Vendor-Agnostic**

No platform agenda. Our recommendations are driven entirely by your environment and goals.

## MATURITY ASSESSMENTS

*An honest picture of your current state, your gaps and what to prioritize.*

### **SIRI** *Smart Industry Readiness Index*

- World's only internationally certified I4.0 framework
- 6,000+ manufacturers assessed across 60+ countries
- 16-dimension assessment of I4.0 readiness
- Global benchmark against industry peers
- Prioritized roadmap output
- ~1 month to complete

### **CESMII** *Smart Manufacturing Roadmap*

- US Dept. of Energy-backed framework
- Six capability area assessment
- Current-state / future-state gap analysis
- Strategic roadmap with prioritized investment areas
- Practical focus on operational improvement
- Designed for North American manufacturers
